

Case Study:

# Microsoft SharePoint Server 2007 Implementation Short-term Loan Industry Leader

## About Experis

Experis is a leading provider of customized IT staffing, technical and business process solutions with offices across major markets in the United States, Canada and Europe.

Now a ManpowerGroup company, Experis leverages their expertise by providing clients with a single source solution for highly skilled talent and technology solutions in the areas of IT, engineering, finance and healthcare.

## Client Situation

One of the nation's leaders in the short-term loan industry needed to replace their current intranet. They wanted to take advantage of Microsoft Office SharePoint Server (MOSS) 2007 capabilities including document management, collaboration, blogs, wikis, team sites, and Outlook 2007 integration. The client also sought to reinforce their new branding and to launch the intranet in conjunction with their headquarters move and consolidation. The overall objective was to create a solution that provided an effective means of communicating across the enterprise, increased productivity of key business units and secured access.

## Experis Solution

Experis partnered with the client to launch within 60 days of starting detailed requirements definition and installation. The intranet provided the client access to key MOSS 2007 capabilities.

- Highly-effective communication with announcements, blogs, wikis and alerts
- High user productivity with project workspaces and Outlook integration
- Corporate branding by creating branded site templates
- Content management and document management with custom page layouts and master pages
- Secure access using SharePoint groups

Experis provided the SharePoint Architect and Development expertise to make the project a success and was uniquely qualified to assist for a myriad of reasons, including our direct experience developing and implementing portal based solutions, our web design and usability skills, and our proven ability to deliver. We offered a hybrid delivery model using one of our Senior SharePoint Architects and proven Project Manager with our offshore development center.

Experis™ IT
